

WORLD HAPPENINGS BRIEFLY TOLD

12 Gen. F. R. Moritz, British officer who planned the deaths of the western front invasion, has been hanged.

Canada will emerge from the war with electric power production facilities 21 per cent in excess of 1918, according to a report from the Dominion Department of Public Works.

Highest scoring bomb fighter is Spide, Ltd. Joseph Henry, who brought down 40 during the Battle of London, the air ministry announced.

Australia will continue to produce plastic explosives and other war materials after the war, Sir Donald Cameron, aircraft production minister, said.

Black marketeers in New England have paid a total of \$500,000 to the U.S. government as penalties for raising violations, a recent survey showed.

The de Gaulle regime announced that 1450 Freuchen were killed and 1552 were wounded at the Paris barricades during the battle for liberation of the capital.

Sir James Gage, British War Secretary, reports that ravaging on the eastern coast of Germany has been entirely carried out by German military authorities.

Nazi soldiers in eastern France were warned not to commit suicide because in time of war it is considered an act of desertion. A captured enemy order released by Allied headquarters disclosed.

The Royal Indian Navy now has the production of ships greater than at the outbreak of war. There is an increased number of Indian ships in command of ships and in other high posts.

Included in a medical collection on view in Johannesburg, South Africa is a medicine chest which is a hold-up of pills made up by Captain James Watson, a famous explorer, for treatment of "interior fever".

Demand For Salt

Production in Canada Reached New Record Last Year

Recent figures from the Dominion Bureau of Statistics show that the production of sodium chloride, commonly known as salt in Canada reached a record high during 1943 in both quality and quantity. The output of the industry, which has been steadily increasing since 1938, reached 85,000 tons, valued at \$4,378,378.

The market for salt in the Dominion is entirely inelastic. Domestic production is sold principally to the dairy, meat curing and tanning industries, fertilizer, chemical industries; as table salt and to highway and transport departments for use as road stabilizers.

The use of salt in soil stabilization for the foundation of highways and for a surface veneer for gravel roads has shown a marked increase in recent years. It has been used extensively also in the soil-stabilized bases for runways at Canadian air bases. Road, graded and salt along main highways, remains loose and free-flowing even in the coldest weather when salted roads are allowed easy distribution on icy roadways.

Not A Record

Canadian Hear Value Of Big Ben Directly From Clock

To Canadians listening to the BBC, the booming voice of Big Ben was as familiar as the chiming of their own ball clock! The first broadcast of the British Parliament's famous clock was made on December 31, 1933, nearly 21 years ago. Since then the voice of Big Ben has come from the clock tower, not from a gramophone record of it.

The microphone, installed above the tower bell of the Palace of Westminster, brought into service instantly, at any time, by the pressure of a switch at Broadcasting House in London, has been the quarters of the British Broadcasting Corporation. Big Ben broadcasts up to 40 times a day in the B.B.C. short-wave transmission, providing living up to the title of the Empire's signature tune.

Army Formations

Same Number Of Men For Canadian And British Units

Names of British Army Formations are familiar to all newspaper readers. But how many men does it take to make up these formations? Number of men vary from time to time as varying the varying rules of the unit has to play. In general the figures for British and Canadian units are as follows:

Company: 80-100 men.
Battalion: 1,000-1,500 men.
Regiment: 3,000-5,000 men.
(The Germans do not have brigades. Instead they regiment roughly corresponds to our brigades, though smaller).
Division: 12,000-15,000 men.
Corps: 25,000 to three divisions.
Army: Three corps.
Army group: Two or more armies.
—London Express.

Center all now is used in the production of perma- 208

Churchill To Canada: "God Bless You All!"

SUNDAY SCHOOL LESSON

OCTOBER 1

TENETS THE EMPIRE OF THE

Golden rule: I was the light of the world; he that toucheth me shall not find darkness, but the light of life. John 1:9.

Lesson: Isaiah 43:1-12. MONTGOMERY SAYS GERMANY MIGHT FIND IT DIFFICULT TO CARRY ON GUERRILLA WARFARE

LONDON—An epidemic of speculation has seized the London press during the past week as the "city" political writers have tried to answer the question, "What will the Germans do after the war?"

What will the Germans do after the war? This is the question which, especially the Nazi party members, are asking themselves. At present the only certain knowledge is that they have received the word from the German government that they will continue to organize guerrilla warfare in Germany.

The tendency among political observers here is to take for granted the ability of the Nazis to carry out this policy. But, as Field Marshal Montgomery has said, to give the order to conduct guerrilla warfare is one thing, but to carry it out is quite another. This implies he is not considering the German people in the future, of conducting any serious military campaign against the Allies.

Their country, for one thing, is one of the most difficult in the world to get a trouble break out in in any particular corner, we could not fasten them on a single spot in the world.

Even in Poland, where the pattern of operations has been so severely as to make it impossible for the Germans to escape from German power, after committing acts of sabotage and almost uncountable. Recently, could the Nazis, against a guerrilla, count on the support of the German population? To this question no definite answer has been given but we know that the Nazi Government, the art of inflicting has been widely practiced and encouraged among the Germans.

FOR SECOND TIME

Canadian Destroyer S.S. Laurent Rescues Survivors of S.S. Lusitania

OTTAWA—For the second time in his career, the veteran Canadian destroyer S.S. Laurent has had German boats as "guests," the time was when the U-boat sank the Lusitania. The very fact is a great relief to the S.S. Laurent picked up the survivors "a large number" after the Lusitania was sunk in the bottom by an aircraft of the R.A.F. could command during an air battle.

The release did not say when the attack occurred. The first time the S.S. Laurent "entertained" Nazis was after she and the Canadian Frigate Swansea dived in the destruction of a U-boat in the North Atlantic. That time 45 German survivors were taken from the water. The U-boat's crew then only 45 men were taken from the water. The Lusitania was sunk in 1915. The Lusitania was sunk in 1915. The Lusitania was sunk in 1915.

Renewed Acquaintance

Mr. Roosevelt and Mrs. Churchill renewed acquaintance at Quebec. Here they are pictured together on the terrace at the Citadel.

GIVES UP POST

Saskatchewan's Lieutenant-Governor is Retiring From Public Life

REGINA—A grand old piece of the province, Hon. Archibald J. McNaughton has decided to lay aside the burden of public life.

His health is given as his reason. Announcement of his retirement was made following a visit from Ottawa that the federal cabinet was giving attention to the appointment of a new lieutenant-governor.

The long years of service for the Saskatchewan's lieutenant-governor, who was elected to the post in 1921, have been a long and successful one. He has been a member of the legislature for Saskatchewan for 12 years, and a member of the federal cabinet for 12 years.

He was a cabinet minister for many years and later acted as the lieutenant-governor.

His country, for one thing, is one of the most difficult in the world to get a trouble break out in in any particular corner, we could not fasten them on a single spot in the world.

Even in Poland, where the pattern of operations has been so severely as to make it impossible for the Germans to escape from German power, after committing acts of sabotage and almost uncountable.

Recently, could the Nazis, against a guerrilla, count on the support of the German population? To this question no definite answer has been given but we know that the Nazi Government, the art of inflicting has been widely practiced and encouraged among the Germans.

ARE WELL-TRAINED

No Complaint Received in Regard To Reinforcements From Overseas

OTTAWA—Defence headquarters said in a statement that Canadian reinforcements are "well trained in Canada and that this training includes grenade, fire gun and flat training."

"No complaints whatever" have been received from the general officer commanding-in-chief overseas of "insufficiently trained reinforcements," according to the statement issued here by Major Percy Smythe charged in a statement in Toronto that reinforcements being received overseas were "poorly trained."

The statement was released made on Monday by Major Smythe, referring merely to "a statement in the morning papers" that reinforcements were being sent to France.

The headquarters statement follows:

"As far as training in Canada is concerned, the statement is simply not understood."

Canadian reinforcements are well trained in Canada. The training includes grenade, fire gun, and flat training. This training is continued in the United Kingdom.

With regard to overseas, special inquiries are being made but no plants whatever have been received from the general officer commanding-in-chief overseas of "insufficiently trained reinforcements."

The performance of the reinforcements from Canada in France, demonstrates their ability to handle them effectively.

ARMISTICE TERMS DISCLOSE FINLAND HAS TO PAY HEAVY PRICE FOR ASSISTING GERMANY

To Washington

LONDON—Finland has agreed to pay the Soviet Union a heavy price in rich strategic territories and cash for assistance in carrying out its fighting on the side of Germany.

After Prime Minister Ristio of Finland, having been informed of the terms of the armistice signed with the Soviet Union, has said that "this is the worst of the worst days in our history" and questioned whether the country could be getting out of the war.

The 23-clause armistice, terms of which stipulated that the Finnish army should be getting out of the war, cost the Finnish \$200,000,000 in cash and other territorial concessions.

1. Immediate restoration of the 1939 Finnish border and the 1944-war. This meant the return of the territory of the north of Lake Ladoga which includes the city of Viipuri and is the most important in getting out of the war, cost the Finnish \$200,000,000 in cash and other territorial concessions.

2. The return of the city of Viipuri and is the most important in getting out of the war, cost the Finnish \$200,000,000 in cash and other territorial concessions.

3. The return of the city of Viipuri and is the most important in getting out of the war, cost the Finnish \$200,000,000 in cash and other territorial concessions.

4. The return of the city of Viipuri and is the most important in getting out of the war, cost the Finnish \$200,000,000 in cash and other territorial concessions.

5. The return of the city of Viipuri and is the most important in getting out of the war, cost the Finnish \$200,000,000 in cash and other territorial concessions.

6. The return of the city of Viipuri and is the most important in getting out of the war, cost the Finnish \$200,000,000 in cash and other territorial concessions.

Fur Farming Occupies A Very Important Position In The Industries Of Canada

THIS year according to W. M. Ritchie, Chief of the Fur Inspection and Grading Service, Dominion Department of Agriculture, the Canadian fur industry is in a healthy condition, both from the viewpoint of those engaged in fur production on fur farms and in trapping and those in the manufacturing and retail trades.

Fur farming is the big business branch in Canada. Mr. Ritchie estimates it represents an investment of about \$10,000,000. In 1943 it was valued at \$10,000,000. It is one of the Canadian raw fur production, comprising pelts sold from fur farms and those brought by trappers, worth \$94,364, a new record and eleven per cent above the value in 1942. Most pelts brought the last with a value of \$54,000,000, muskrat came second with a value of \$1,000,000, silver fox third with a value of \$4,000,000, and coyote or prairie wolf fourth, valued at \$1,000,000. Twenty other kinds of fur pelts sold for more than \$130,000,000.

Since the war began the fur trade in Canada has been enjoying a good measure of prosperity due to the general shortage of new furs and to the high rate of employment causing more people to have money to spend among whom is a high percentage of women workers.

While Canada contributes substantially to the country's requirements for fur raw supplies are, however, imported from the United States and other countries. New York City is the principal centre of the U.S. fur trade.

Since the introduction of the price fixing in 1941 until recently, imports of furs from the United States have been limited to one-third of the total imported in 1941. From the last of the recent lifting of this limit there has been a sharp increase in the entry into Canada of furs of all kinds, particularly to the fur trade, which has been a boon to the fur trade for women's coat winter. Pelts of the fur which come from the United States are of the highest quality and are in great demand. But Canadian lamb is an inexpensive fur compared with mink. Top grade mink sold last year at a price of \$400 a pelt. Pelts of inferior or second grade were bought for \$100 to \$150. It takes 80 pelts to make a mink coat and such a garment made of inferior top grade pelts will retail at around \$7,500. With care much a coat would last more than the lifetime of the average woman.

Among fur of strictly Canadian origin, mink is the most important and fur are leaders. In recent years what are known as New Mutations types of mink have caused the greatest changes in the field of production of fur. Among the new types are the platinum, platinum blue, platinum white, black and silver. Arctic blue mink has been recently added in Montreal at the top price of \$300 a pelt, but the average price for the high grade mink has risen from \$125 to \$250, though the low grade silver fox pelt may be bought for \$100 to \$150. Muskrat, Arctic blue, mink and silver fox are the most valuable furs. Pelt is made, is always a ready seller. Pelt is usually sold from \$1 to about \$500 a pelt according to the quality.

Mr. Ritchie says that those engaged in the fur production industry are now paying much more attention to quality. Since grading was introduced in 1941 on fur pelts for export it has caused an all round improvement in production. More attention is being paid to breeding and to ranch management so as to get better pelts.

Before the war Britain marketed about 60 per cent of the output of Canadian silver fox pelts. Since 1939 the market has been closed and the United States market has been open since 1940, pelts per year.

In 1939 Canada produced about 250,000 silver fox pelts. Last year the output was about 140,000 but it is infinitely higher than in the pre-war years.

Just now there is a big demand for furs because people have money to spend and with the new fur fashions and furs help for the fur trade at a premium the supply is not plentiful, and the demand has increased.

Just Common Sense

Should These People Nominations Be Not Telling It Anything

A letter to the Vancouver Free Press says: "How much longer are the general public going to be lulled into thinking the nominations were genuine the way it was at 2 o'clock, September 18, was really telling."

"I certainly wish it were true, or sooner, but one does not need to be a mathematician to see that if you take the date of your birth and add your age it will add up to 1944."

Also if you take the year of your going into office and add the number of years in office and you will find it adds up to 1944. Add 1944 and 1944 and you have 3888. All very simple, isn't it?

Run into in automobile tire can be repaired by maintaining proper air pressure.

A Dieppe veteran of 45, Pte. R. P. Hall, Winnipeg, Sask., talks the situation over with a Belgian prisoner near Nieuport.

Eerie Type Of Warfare

Solo Air War Very Quiet After Fighting In Belgium Last Few Years

The comparatively quiet push across the Seine was an eerie type of warfare after the days in Belgium when the guns were going all the time and week after week you drove the same roads near the same place and got to know by sight practically all the civilians in the district. If you got off the main roads in the Seine area you could sometimes drive a mile or two hardly seeing any sign of life. The jeep motor and the friction of its tires on the asphalt road were often the only sounds. Downed of roads criss-crossed the Canadian area winding through plant forests and though all the small ones had been checked for mines and landmines, you could drive through without seeing any evidence of the war.

For four years the historic town was the centre of the war. The British Army and reduced to ruins, but largely rebuilt after the war. The town was a memorial to British soldiers fighting in the Mitter fighting of the three battles of Ypres and there are 400 graves there within two miles of the town.

Ypres will be continued in Canadian history for the motor in which men of the Red and Red Guards of the last Canadian Division, fought German gas attacks April 24, 1915, with no more protection than handkerchiefs and linen bandoliers dipped in water.

EXPENSIVE SHOWS

A pale of tan calfskin men's shoes to cost \$200 by a Chicago department store. They have gold tips in the heels, gold eyelets and gold-tipped laces. The purchaser was an unnamed member of the motion picture industry.

The true forerunner of the modern machine gun was the Polybolos bow using men known in the Egyptian 5000 years before the Christian era.

Canadian Fliers Worship in France

Members of an R.C.A.F. Typhoon wing in Normandy recently marked the simultaneous deaths of three squadron commanders with an early morning church service at one of the sacred points. Officers called the "sacred chapels" (upper left) LAC Walter "Toby" Beave, Tumbler, Ont., the padre's personal driver, guides the boys and the United States pilot cover at the close of the service which was held in a barnyard which field with a Typhoon as background and empty gasoline tins and ammunition boxes and a sign of the R.C.A.F. Typhoon wing.

A Break For Father

Loss Shredding Would Be Required By New Type Furnace

Father shouldn't have heart as intense approach and "that old dog" in the other side of the street. "Get me the shovel and the shovel," Pte. 775 went on saying. "The fact is Father is likely to get a break before long in the form of a new type of furnace which will be able to burn the most of the house and make child's play of stoking the present inefficient monster."

This new furnace is a tiny affair, weighing only 75 pounds, and occupies the small space of two feet by two by three. It can heat an ordinary house in fifteen minutes, as compared with about forty-five minutes by older types. It has been developed by the authorities of Pennsylvania after ten years of research by their engineers who have adopted original principles of combustion. Laboratory tests show the appliance to give impressive results. The authorities insist there is no intention of marketing or marketing the furnace, it has merely created it, and will have further developments to the manufacturing.

The compact heating unit is simple in design and consists of a pipe which is heated by the furnace. It is almost identical with that of a kitchen radiator. At the other end of the pipe, relatively where the most is fed through the funnel of the grinder, is a hopper which feeds the coal into the furnace. The furnace is a screw-like which pushes the coal forward. Under the coal, the furnace is a hopper which feeds the coal forward. Under the coal, the furnace is a hopper which feeds the coal forward.

Under the coal, the furnace is a hopper which feeds the coal forward. Under the coal, the furnace is a hopper which feeds the coal forward. Under the coal, the furnace is a hopper which feeds the coal forward.

Under the coal, the furnace is a hopper which feeds the coal forward. Under the coal, the furnace is a hopper which feeds the coal forward. Under the coal, the furnace is a hopper which feeds the coal forward. Under the coal, the furnace is a hopper which feeds the coal forward. Under the coal, the furnace is a hopper which feeds the coal forward.

Under the coal, the furnace is a hopper which feeds the coal forward. Under the coal, the furnace is a hopper which feeds the coal forward. Under the coal, the furnace is a hopper which feeds the coal forward. Under the coal, the furnace is a hopper which feeds the coal forward. Under the coal, the furnace is a hopper which feeds the coal forward.

Under the coal, the furnace is a hopper which feeds the coal forward. Under the coal, the furnace is a hopper which feeds the coal forward. Under the coal, the furnace is a hopper which feeds the coal forward. Under the coal, the furnace is a hopper which feeds the coal forward. Under the coal, the furnace is a hopper which feeds the coal forward.

Under the coal, the furnace is a hopper which feeds the coal forward. Under the coal, the furnace is a hopper which feeds the coal forward. Under the coal, the furnace is a hopper which feeds the coal forward. Under the coal, the furnace is a hopper which feeds the coal forward. Under the coal, the furnace is a hopper which feeds the coal forward.

Under the coal, the furnace is a hopper which feeds the coal forward. Under the coal, the furnace is a hopper which feeds the coal forward. Under the coal, the furnace is a hopper which feeds the coal forward. Under the coal, the furnace is a hopper which feeds the coal forward. Under the coal, the furnace is a hopper which feeds the coal forward.

Under the coal, the furnace is a hopper which feeds the coal forward. Under the coal, the furnace is a hopper which feeds the coal forward. Under the coal, the furnace is a hopper which feeds the coal forward. Under the coal, the furnace is a hopper which feeds the coal forward. Under the coal, the furnace is a hopper which feeds the coal forward.

Under the coal, the furnace is a hopper which feeds the coal forward. Under the coal, the furnace is a hopper which feeds the coal forward. Under the coal, the furnace is a hopper which feeds the coal forward. Under the coal, the furnace is a hopper which feeds the coal forward. Under the coal, the furnace is a hopper which feeds the coal forward.

Canada Has Been Supplying The West Indies With Horses For Their Mounted Police Work

To parody a favorite Gilbert and Sullivan ditty, "When constabulary duty is to be done, the policeman's horse is quite a happy one—on the West Indies. The police there are Canadian and many of them. When a mounted policeman is on duty in Trinidad, he rides a Canadian horse. When a constabulary patrol makes its rounds in the Barbadoes, it is mounted on Canadian steeds.

Yet few Canadians may know that during the past eleven years Canada has supplied the police horses for the constabulary in the British West Indies islands of Trinidad and Barbadoes.

Police authorities of these two British crown colonies have found that Canadian half-bred horses are superior to a Thoroughbred stallion and produced under the breeding policy of the Dominion Department of Agriculture possess the best type and stamina required for police work. Since the initial shipment of Canadian police horses to the British West Indies eleven years ago Canada has supplied about 75 head to Trinidad and Barbadoes. Shipments came in 1932, 1933, 1934, 1935, 1936, 1937, 1938, 1939, 1940, 1941, 1942, 1943, 1944, 1945, 1946, 1947, 1948, 1949, 1950, 1951, 1952, 1953, 1954, 1955, 1956, 1957, 1958, 1959, 1960, 1961, 1962, 1963, 1964, 1965, 1966, 1967, 1968, 1969, 1970, 1971, 1972, 1973, 1974, 1975, 1976, 1977, 1978, 1979, 1980, 1981, 1982, 1983, 1984, 1985, 1986, 1987, 1988, 1989, 1990, 1991, 1992, 1993, 1994, 1995, 1996, 1997, 1998, 1999, 2000, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019, 2020, 2021, 2022, 2023, 2024, 2025, 2026, 2027, 2028, 2029, 2030, 2031, 2032, 2033, 2034, 2035, 2036, 2037, 2038, 2039, 2040, 2041, 2042, 2043, 2044, 2045, 2046, 2047, 2048, 2049, 2050, 2051, 2052, 2053, 2054, 2055, 2056, 2057, 2058, 2059, 2060, 2061, 2062, 2063, 2064, 2065, 2066, 2067, 2068, 2069, 2070, 2071, 2072, 2073, 2074, 2075, 2076, 2077, 2078, 2079, 2080, 2081, 2082, 2083, 2084, 2085, 2086, 2087, 2088, 2089, 2090, 2091, 2092, 2093, 2094, 2095, 2096, 2097, 2098, 2099, 2100, 2101, 2102, 2103, 2104, 2105, 2106, 2107, 2108, 2109, 2110, 2111, 2112, 2113, 2114, 2115, 2116, 2117, 2118, 2119, 2120, 2121, 2122, 2123, 2124, 2125, 2126, 2127, 2128, 2129, 2130, 2131, 2132, 2133, 2134, 2135, 2136, 2137, 2138, 2139, 2140, 2141, 2142, 2143, 2144, 2145, 2146, 2147, 2148, 2149, 2150, 2151, 2152, 2153, 2154, 2155, 2156, 2157, 2158, 2159, 2160, 2161, 2162, 2163, 2164, 2165, 2166, 2167, 2168, 2169, 2170, 2171, 2172, 2173, 2174, 2175, 2176, 2177, 2178, 2179, 2180, 2181, 2182, 2183, 2184, 2185, 2186, 2187, 2188, 2189, 2190, 2191, 2192, 2193, 2194, 2195, 2196, 2197, 2198, 2199, 2200, 2201, 2202, 2203, 2204, 2205, 2206, 2207, 2208, 2209, 2210, 2211, 2212, 2213, 2214, 2215, 2216, 2217, 2218, 2219, 2220, 2221, 2222, 2223, 2224, 2225, 2226, 2227, 2228, 2229, 2230, 2231, 2232, 2233, 2234, 2235, 2236, 2237, 2238, 2239, 2240, 2241, 2242, 2243, 2244, 2245, 2246, 2247, 2248, 2249, 2250, 2251, 2252, 2253, 2254, 2255, 2256, 2257, 2258, 2259, 2260, 2261, 2262, 2263, 2264, 2265, 2266, 2267, 2268, 2269, 2270, 2271, 2272, 2273, 2274, 2275, 2276, 2277, 2278, 2279, 2280, 2281, 2282, 2283, 2284, 2285, 2286, 2287, 2288, 2289, 2290, 2291, 2292, 2293, 2294, 2295, 2296, 2297, 2298, 2299, 2300, 2301, 2302, 2303, 2304, 2305, 2306, 2307, 2308, 2309, 2310, 2311, 2312, 2313, 2314, 2315, 2316, 2317, 2318, 2319, 2320, 2321, 2322, 2323, 2324, 2325, 2326, 2327, 2328, 2329, 2330, 2331, 2332, 2333, 2334, 2335, 2336, 2337, 2338, 2339, 2340, 2341, 2342, 2343, 2344, 2345, 2346, 2347, 2348, 2349, 2350, 2351, 2352, 2353, 2354, 2355, 2356, 2357, 2358, 2359, 2360, 2361, 2362, 2363, 2364, 2365, 2366, 2367, 2368, 2369, 2370, 2371, 2372, 2
